

SAINT KEVIN'S GARDEN CLUB

WEDNESDAYS @ 1:45 – 2:30

We are attempting to put some manners on the green spaces around our school! We also want to grow some grub and flowers to improve the look of the school space but also as a tool for learning. There is so much going on out there and as a green school we want to get the classes out exploring and investigating. So, if you like the sound of that, get involved! There will be a few green fingered kids, Angela and some of you! You absolutely don't have to have loads of knowledge or experience (I don't have either!) just a willingness to get stuck in! Let me know if you fancy it.
